The share of Ukrainians who oppose the recognition of the occupied territories of Ukraine as a condition for ending the war is increasing

According to the All-Ukrainian nationally representative poll, conducted by Info Sapiens on 14-15 March, 2022, 84% of Ukrainians oppose the official recognition of Crimea as part of Russia as a condition for ending the war (whereas on 3-4 March the number was 75%), and 83% of Ukrainians are against the official recognition of the formerly occupied areas of Donbas as part of Russia (in the first wave of the survey the number was 79%). At the same time, the share of those who oppose the ban on Ukraine's accession to NATO fell from 56% to 51%.

If it guaranteed an immediate end to the war which of the following scenarios, if any, would you be willing to accept, even if reluctantly ?

Among all respondents

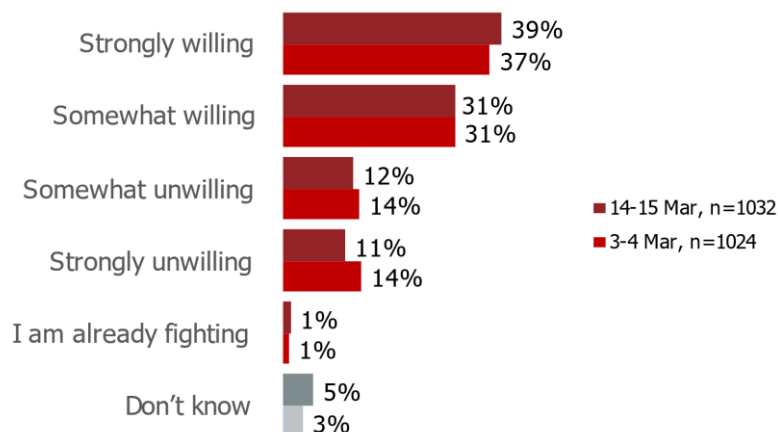

70% of Ukrainians are ready to personally offer armed resistance to end the Russian occupation of Ukraine: in particular, 79% of men and 59% of women. This is slightly different from the last wave, however, the share of those who do not want to take up arms have dropped significantly from 28% to 23% mainly because of women (in the first wave of the survey 36% of women did not want to take up arms, and now it is 29%).

Are you personally willing or not willing to put up armed resistance to stop a Russian occupation of Ukraine?

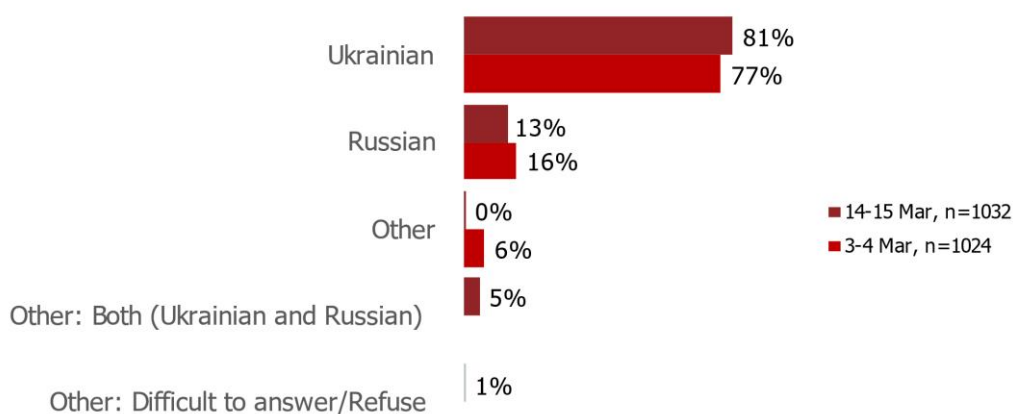

Among all respondents

The share of those who consider Ukrainian their native language has also increased from 77% to 81%.

What language do you consider your native?

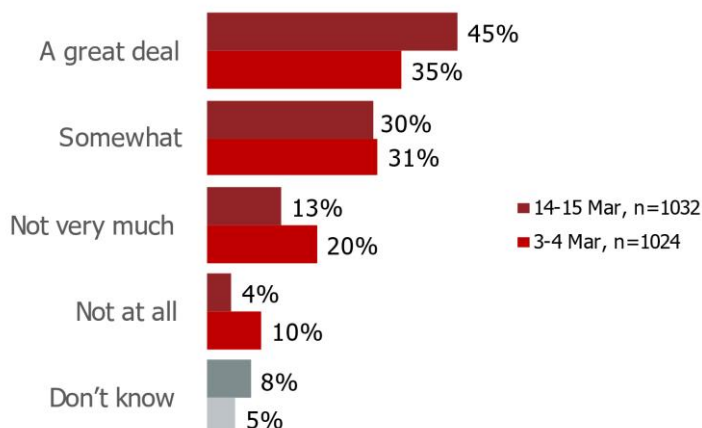

Among all respondents

75% of Ukrainians believe that ordinary Russians are guilty of armed aggression, and 17% of Ukrainians believe the opposite (it differs from 66% and 30% in the first wave of survey, accordingly).

In your opinion, how much are ordinary Russians to blame for the invasion?

Among all respondents

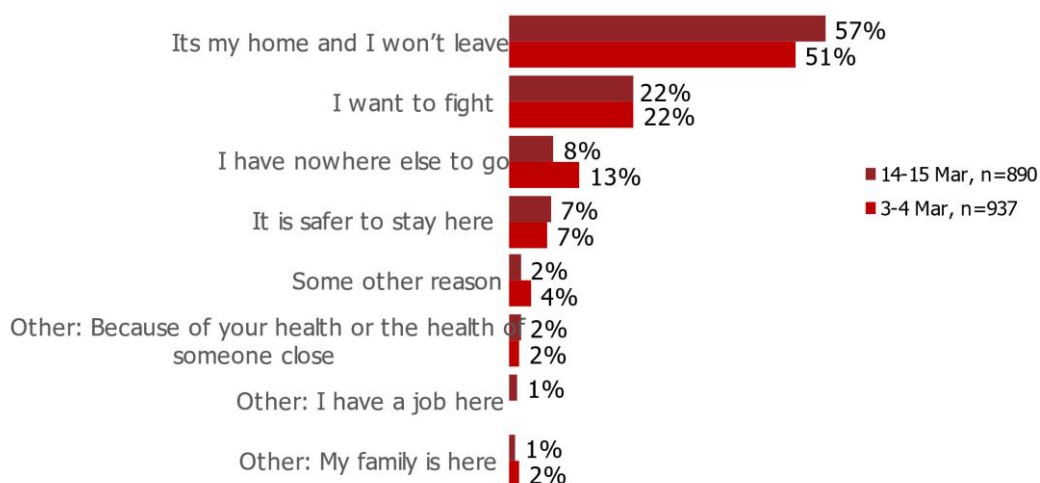

Regarding the personal situation, 13% of Ukrainians went to other settlements within Ukraine (we did not interview those who went abroad, as most refugees do not respond due to the high cost of roaming).

The most common reasons why people do not leave are “This is my home, I don’t want to leave it” (57%) and “I want to fight and protect” (22%).

Which is the main reason you decided to stay put?

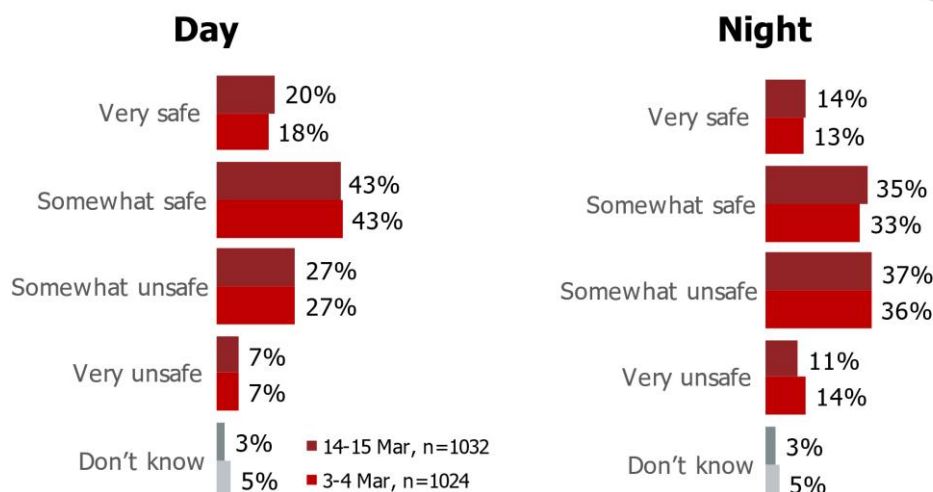

(% those who are at the same place as before the war, N = 890)

34% of Ukrainians feel in danger during the day and 48% of Ukrainins feel in danger at night time. This is roughly in line with the previous wave.

How safe or unsafe do you currently feel during the...

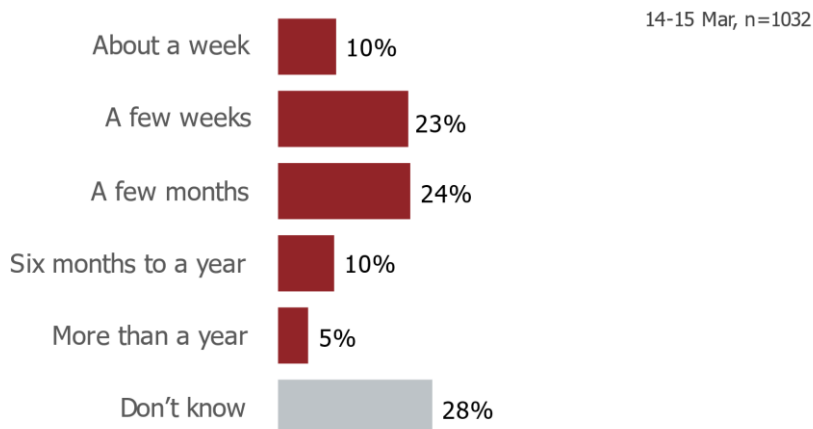

Among all respondents

Only 10% of Ukrainians believe that the war will end within a week, while the majority (62%) believe that it will last from a few weeks to more than a year.

How much longer do you think the war with Russia will last?

Among all respondents

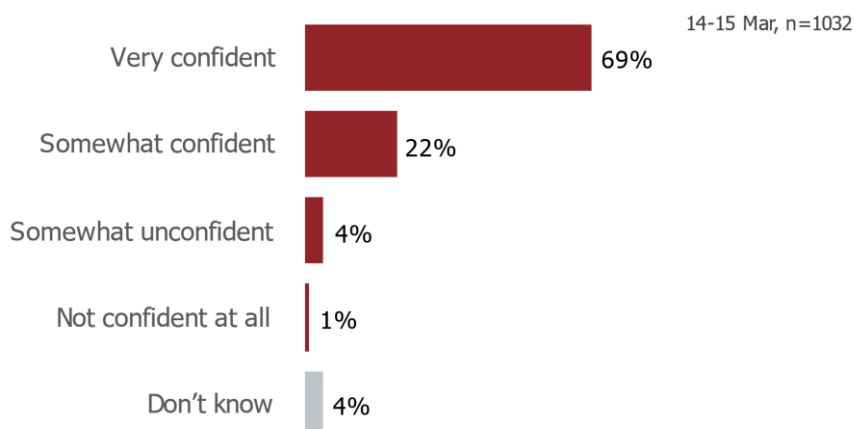

91% of Ukrainians are convinced that Ukraine will be able to repel Russian attack and only 5% doubt it.

How confident are you that Ukraine will repel Russia's attack?

Among all respondents

Research Information

The sample of the study consists of 1032 respondents. The survey was conducted by CATI (computer-assisted telephone interviews) based on a random sample of mobile phone numbers. The sample is representative of the adult population of Ukraine (ages of 18 and older) by gender, age, size of settlement and region of residence. The Autonomous Republic of Crimea and the city of Sevastopol were removed from the study. In Donetsk and Luhansk oblasts, the survey was conducted only in the territories controlled by Ukraine. Also, the survey does not cover Ukrainians who have gone abroad.

The maximum theoretical error does not exceed 3.1%. The survey was conducted on 14-15 March, 2022.

About Info Sapiens

Info Sapiens specializes in public opinion polls, behavioral measurements, and secondary data analysis. The company adheres to all ESOMAR research standards.
